EARN IT RIGHT

Every Parent Wants Their Child to Succeed

We help them — by building the 7 core skills
that science says actually predict success

Seed Round · Aditya Shrivastava · Ex-Zomato · Ex-Urban Company

THE PROBLEM

₹50,000+/year on academics.
₹0 on character development.

60%
Kids on 2-4 hrs
screen time daily

10M+
Children diagnosed
with ADHD annually

82%
Schools with no
counsellor or psychologist

Nuclear families rising. Urban fertility dropped to 1.6-1.9 — single-child families are the new normal. 83% of kids on screens daily. 45% show behavioural issues. 70% of obese kids eat junk 3x/week. 10M+ ADHD diagnoses/year. 82% of schools have no counsellor. Parents are completely on their own.

7 SKILLS THAT PREDICT EVERYTHING

50+ years of longitudinal research. Every skill is teachable.

- Delayed Gratification
- Executive Function
- Grit & Perseverance
- Emotional Regulation
- Growth Mindset
- Kindness & Empathy
- Curiosity

Stanford · Harvard · Yale · UPenn · George Mason

THE PRODUCT

Every action → Skill → AI-scored points

30+
Skill-tagged actions across 7 life skills

3-Layer
AI suggestion engine
Keywords → MiniLM → Fallback

₹0
Marginal cost per user
AI runs locally on device

5-8
Family members per child
Built-in viral loop

PWA — works on any phone. Gamified: quests, streaks, themed UI. Whole family participates.

THE AI MOAT

Not a feature.
The core product.

01 Frontier LLMs for now (low compute needs) → custom lightweight model built on our proprietary data

02 AI Coach generates weekly Growth Reports per child — no human needed. LLM-powered, low API cost.

03 Flags when a child needs professional help — drives expert sessions

04 Custom model trained on our data replaces LLMs entirely. Predictive: "Pattern X at age 5 → intervention Y by age 8"

Endgame: the world's most informed child development advisor — trained on millions of real interactions.

THE 5-LAYER MODEL

Full-stack child development

5	**MEDICATION**	Prescribed by our experts. Delivered. Impact tracked in app. India underserved → US $15B+
4	**OWNED EXPERTS**	Our psychologists. Virtual + in-person. AI pre-briefs before every session.
3	**AI COACH**	Daily nudges. Weekly reports. Flags when child needs professional help. ₹0 marginal cost.
2	**APP**	Daily action logging → 7 skill scores. Gamified. Family system. Free forever.
1	**CONTENT**	SEO content hub. YouTube. WhatsApp virality. Top of funnel.

Each layer makes the next one impossible to replicate.

THE MARKET

$404B global market.
50x spend gap: India vs US.

TAM

$404B

Global pediatric mental health market (2024)

US

$97B

US behavioral health alone $900/child/year

INDIA

$20B

India — only $18/child/year
50x gap = 50x upside

India proves the model at Indian costs. US expansion at 50x pricing. Every 1% gap narrowing = ₹2,000 Cr market expansion.

THE SPEND GAP

₹75K-16L per child per year.
₹0 on character.

School	Coaching	Extracurricular	Character Dev
₹25K-14.5L	₹13K-2L	₹36K-1L	₹0

USA
$900/child/yr
on behavioral health

China
$17,400/child/yr
on tutoring (17.5% kids mental disorders)

UAE
$10-25K/child/yr
3.5M Indian diaspora

Indian psychologists at $18-36/session → serving UAE ($50), UK ($80), US ($120). Same quality, 10x cheaper.

TRACTION

Built in 48 hours. Already live.

✓ Live PWA app with real families using it

✓ AI engine with 3-layer skill classification

✓ SEO content site ranking for parenting

✓ YouTube explainer video live

Zero CAC. All organic. Extreme capital efficiency — entire platform built by one person with AI.

REVENUE MODEL

5 revenue engines. Compounding moat.

AI Coach	Expert Sessions	Medication
₹299/mo	₹1.5-5K/session	₹500-2K/mo
90% margin	100% capture	Recurring

Year 2	Year 3	Year 5
₹50L	₹2.5 Cr	₹20 Cr

Parents pay ₹1.7L-14.5L/year for school. Character development at ₹3-6K/year is <5% of that.

WHY WE NEED CAPITAL: THE AI MOAT

API first. Build in-house.
Human layer no one can copy.

Y1	YEAR 1: API	API-powered (Claude/GPT) · ₹30-50L/yr · Every call = training data	₹30-50L/yr
Y2	YEAR 2: IN-HOUSE	In-house light model · Replaces 80% API · ₹0/user · On-device	₹6-10L/yr
Y3-5	YEAR 3+: OWN MODEL	Proprietary LLM · Replaces 100% API · Predictive · Licensable	₹0/yr

1 week	6 months	2+ years	5+ years
to copy keyword rules	to replicate light model	to replicate LLM	to replicate predictive

Anyone can call an API. No one can replicate our data + our psychologists.
The tech moat compounds daily. The human layer is unreplicable from day one.

THE TEAM

Built to win.

Ex-Zomato · Ex-Urban Company

Urban Company

Built the supply-side marketplace.
Same ops playbook for owned psychologist network.

Zomato

Deep understanding of Indian consumer behaviour. Network across tech ecosystem.

Capital Efficiency

Built entire platform solo in <48 hours using AI-assisted dev. Proves execution speed.

Chief Clinical Officer

PhD Child Psychology
NIMHANS / AIIMS
10+ years with children
Designs clinical protocols

CTO & AI

Ex-Zomato / Flipkart
ML + LLM expertise
Built production systems
Ships fast, thinks in systems

ADVISORS

Pediatric Psychiatrist
AIIMS / Fortis

School Principal
Top-10 India school

Tech Founder
Series A+ / Parent

Researcher
IIT / Harvard

PATH TO ₹1,000 Cr

India ₹436 Cr + International ₹620 Cr

INDIA · ₹436 Cr

SaaS: 8L families → ₹144 Cr
Experts: 800 psychologists → ₹72 Cr
Centers: 20 locations → ₹100 Cr
Medication: 80K subs → ₹120 Cr

INTERNATIONAL · ₹620 Cr

UAE/GCC: 50K families → ₹60 Cr
SE Asia: 80K families → ₹50 Cr
UK: 40K families → ₹80 Cr
US: 100K families → ₹250 Cr
Intl medication → ₹150 Cr

India → UAE/GCC → SE Asia → UK → US → China

Labour arbitrage: Indian psychologists at $18-36/session serving markets paying $50-300.
UAE first (not US) — 3.5M Indians, same language, 5x pricing, zero regulatory friction.

EARN IT RIGHT

Raising ₹2-3 Cr Seed

₹1 Cr	₹60L	₹20L	₹20L
Product + AI 2 engineers, 6 months	Growth 5K → 25K families	Content + SEO 7 skill pillars	Expert pilots 10 psychologists

Milestone: 25K families · 50% weekly retention · ₹3L MRR · 10 psychologists onboarded

"Every child deserves the tools to build their own character.
We're making that possible — one action at a time."
